

Who is EDC?

EDC Consulting LLC (EDC) is a leading small business provider of enterprise solutions and strategic business support to the Federal Government and the private sector. We are subject matter experts in SAP, Oracle, PeopleSoft, Maximo and Microsoft business systems. We are an SAP PartnerEdge Partner, Oracle Platinum Partner and Premier Business Partner of the IBM Corporation.

EDC has extensive experience designing, developing, implementing and maintaining business systems and software solutions for over 50 different government and commercial entities. We have been recognized in Washington Technology Magazine's "Fast 50" list of Washington DC's fastest growing companies and are consistently named to Inc. 500 magazine's list of the nation's fastest growing privately held companies. We have also been ranked as one of the fastest growing companies in the Commonwealth of Virginia by Virginia Business magazine.

Business Systems

EDC Consulting offers end-to-end implementation and post implementation support services for SAP, Oracle, PeopleSoft and Maximo business systems to name just a few. We are experts at ensuring that these business systems meet our clients' needs of today and tomorrow. EDC Consulting has formal partnerships in place with companies like SAP, Oracle, IBM and many other independent software and hardware vendors and services providers. Over the years we have fine tuned our implementation methodology to meet the needs of different industries and businesses. Our team of consultants includes subject matter experts with significant business experience coupled with many years of implementation expertise in specific industries to help our clients realize true business value and a return on their investment.

Business Strategy

As a strategic business advisor, EDC works alongside its clients to help them develop Business Strategy and implement, maintain and sustain their critical business systems. EDC provides a wide-range of technical services, including Program Management, Portfolio Management, Business Case and Requirements Analysis, Business Process Engineering, Solution Design, Software Development, Systems Engineering, Information Assurance and Enterprise Architecture. We have deep expertise in legacy system conversion, Testing, Training, Configuration Management and Production Support, and have provided these services to a wide range of clients throughout the Department of Defense and civilian Federal agencies.
