

Over the years, EDC Consulting has successfully delivered new Maximo implementations for clients in the Federal government, Oil, Gas and Energy sectors. In every project, we use a proven implementation methodology and leverage the expertise of our senior Maximo consultants to ensure our clients goals are being met.

INSTALLATION AND CONFIGURATION

EDC provides complete installation, configuration and environment management solutions for your Maximo environments.

REPORT DEVELOPMENT

EDC provides report development solutions for Actuate, BIRT, Crystal Reports and many other major reporting solutions.

BEST PRACTICE CONSULTING

Our experienced Maximo consultants can guide your implementation by providing best practice consulting on architecture, data setup, location / asset hierarchies, performance measures and more.

MAXIMO UPGRADES

EDC provides complete Maximo upgrade services to get to your desired version of Maximo using a proven upgrade methodology.

PROJECT ARCHITECTURE AND MANAGEMENT

Our senior Maximo consultants can design your overall solution architecture and provide complete project management throughout the lifecycle of the implementation.

MAXIMO INTEGRATION

We offer complete integration services to connect Maximo to your ERP, document management system, inspection software, condition monitoring and HR applications using the Maximo MEA.

DATA CONVERSION

EDC can extract, transform and load data from other applications into Maximo using our data import software tool.

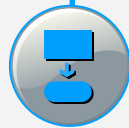

CHANGE MANAGEMENT

Our consultants can help your organization through the change management emotional cycle of change. We provide complete change management solutions throughout all stages of your Maximo implementation.

MAXIMO TRAINING

EDC provides complete Maximo training solutions customized to meet the needs of any organization.

WORKFLOW DEVELOPMENT

Once your business processes are fully documented, it's time to automate them within Maximo. EDC can provide workflow and business process baselines to decrease the overall development time for your work management, inventory management and procurement processes.
